21 Unique New Products Your Patients Will Thank You For

You Choose — Dispense, Prescribe, Enable Patient-Direct Order — Or All 3!

For maximum patient convenience and compliance, stock and dispense your favorite PediFix products in your office or clinic. Choose traditional, multi-pack medical bags, newer, single-patient OTC packs, and consider Dispensing Displays on pages 60-61.

For next-best compliance, refer patients to locally-owned, independent pharmacies, DME and pedorthic stores for immediate purchase after their appointments. Or, enable patient-direct ordering via our Product Guide Brochures, mail, phone (800-PEDIFIX), or online at newly-improved pedifix.com. Please do not send patients searching Amazon.com or 'big box' chain stores, where counterfeits abound, as they'll be disappointed not to find genuine PediFix products, only poor-performing imitations, if any.

Your patients deserve the good stuff – products you can trust, backed by 5 family generations of foot care experts who support your profession. Contact us today to order, find retailers nearby that carry PediFix, or get a supply of Patient Direct-Order Brochures and more information.

We're all here to serve you, your patients, and your practice.

Jon P. Case

President
The PediFix Footcare Company

P.S. Keep a few rolls of our new SoreSpot® Silicone Tape in your office — sooner or later, you're certain to see patients who will need it.

To order or contact us:

Call: 1-800-424-5561 or 845-278-3800

Fax: 1-800-431-7801 or 845-277-2851

"Your Hammer Toe Crests are an excellent method for relieving pain associated with corns and arthritis related to hammer toe deformities"
Dr. R.R. Jupiter, FL

Toe Straighteners (Budin Toe Splints)

Toe Straighteners Align Problem Toes — Conservatively or Post-op

- Straighten crooked, overlapping digits
- Encourage hammer toes to 'flex' to help postpone rigidity
- Soft elastic loops guide deformed toes into place
- Ball-of-foot cushion helps protect metatarsal heads
- Plastic disk (hidden inside) stabilizes loops
- Effective post-operative splint to speed healing

Enhance Surgical Results

Nothing beats these pre-made devices. Because of the foot's irregular contours, we've developed an assortment of anatomically-ideal, ready-to-use post-op splints and rehabilitation aids. Each is intended to replace 'homemade' splints — immediately post-op, in post-op shoes, or later, in normal footwear.

- Speed healing, reduce complications, enhance surgical results, help prevent recurrence
- Precise, adjustable positioning control
- Easy removal and reapplication for bathing, inspection or therapy
- Improve patient convenience, increase compliance
- Conservative relief of discomfort if surgery is contra-indicated, unwarranted or refused.

"I use the Nighttime Bunion Regulator in patients who want to postpone surgery with good results. Post-operatively, they eliminate time spent making and changing homemade splints and the inconvenience they cause my patients"
J.W. MD

"I find using the NightSplint when bunions just begin, it avoids the need for surgery. Really very convenient"
J.P. MD

FootSplints Sizing Chart

Small generally fits Shoe Sizes 4-7
Medium generally fits Shoe Sizes 8-10
Large generally fits Shoe Sizes 10+
Exact sizing is not critical for these products.

Hallux Valgus NightSplint™

Non-Ambulatory Positioning Control

- Immobilizes hallux to speed healing
- Adjustable varus-valgus alignment to maintain ideal surgical result

PediFix Medical Footcare

PediPlast® Custom Digital Devices in Less Than 5 Minutes!

250g jar, hardener and measuring spoon

Clean, fast and easy

PediPlast® is a putty-like material that you mold directly to your patient's foot, where it cures to a soft, permanent form. You control the density and firmness of the finished devices by adjusting the amount of hardening agent added. The process takes only minutes, is clean and trouble-free. After just a few uses, you'll be confident with the material, the process and the consistency of the resulting appliances.

Soft, yet durable

Patients appreciate PediPlast® footcare appliances because they're custom made just for them, and the devices feel good and look natural. The material is non-toxic, non-irritating, hypo-allergenic, soft, yet durable and tear resistant. Washable with soap and water, too. No wasted material, no smell or residue, no refrigeration, no special handling required. PediPlast® has an indefinite shelf life and will not harden until you add the curing agent. Scissor-trim or grind finished devices to make additional alterations after hardening, if needed.

The possibilities are truly unlimited, giving you the powerful ability to respond to situations as they arise — with a quick, custom-made solution to most digital problems — either temporary or permanent.

Exceptional value, too.

PediPlast® is economical. Your cost is usually less than $2.00 per device, and the 250 gram jar can produce as many as 50 appliances, depending on their size and complexity. The cost is affordable for most patients — typically from $10 to $25 per appliance.

Just Mix, Mold & Apply!

PediPlast® is a moldable silicone compound that lets you fabricate soft, durable, custom digital devices in less than 5 minutes. It's fast, easy and versatile, providing you with the ability to relieve a variety of digital conditions.

Use PediPlast® to:

- Cushion and Protect
- Align and Separate

Use PediPlast® to treat dozens of foot conditions, including:

- Bunions and Corns
- Hammer, Mallet, Claw, Crooked, Overlapping Toes
- Amputations
- And More!

New!

800 g jar and 10 tubes of curing agent

Bunion Shield
● Item P44, 1/package, $5.45

"I have to say the Pedi-Gel pads have been a big hit with the patients and a really high quality product. Truly amazing how long they last. The shapes I find most helpful are the U-shape Pad to off-load painful IPK, warts, pre-ulcerative lesions, and the Met Pad to treat general metatarsalgia and lessor MTPJ pain."
Dr. W., South Hadley, MA

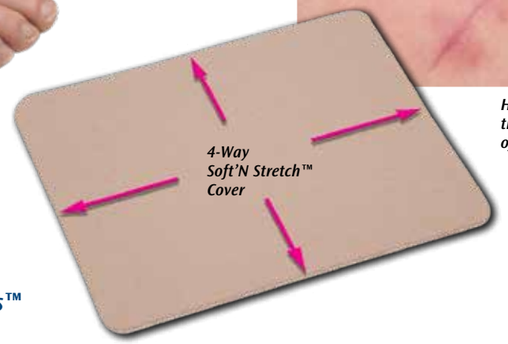
Help Improve the Appearance of Scars!

"Silicone has the best evidence of all treatments for scars"
Mustoe et al, 2002



Visco-GEL® Enhanced Silicon™ Sheets & SkinStrips™

Protects Skin, Reduces Scars

Two benefits and applications! Our special silicon — enriched with SmartGEL® additives — protects skin from shear and minimizes friction to shield calluses and other sore spots. Also helps smooth, soften and improve the texture, color and thickness of scars. Self-adhering. Washable and reusable for repeated applications. Soft, pliable, comfortable. Fabric top cover increases durability, and further reduces friction. Cut to any shape!

PediFix Medical Footcare

Fungus? Here's Help!
ClotrimazOil®

The first and only broad-spectrum liquid antifungal that delivers Clotrimazole 1% in a proprietary, Essential Oils carrier formula

Frustrated with poor results from 'yesterday's' liquid antifungals — Tolnaftate & Undecylenic Acid — and the exorbitant cost of the latest 'wonder drug'? Here's a new alternative…

Clotrimazole is active against 6 different causes of infection and discoloration, including fungus, mold and yeast. Tolnaftate and Undecylenic Acid topicals are not, perhaps explaining their limited effectiveness.

Those old-fashioned drugs are also frequently delivered in water or alcohol carriers, neither providing any inherent or additional antifungal benefits. Our scientists helped pioneer a new process to make Clotrimazole soluble in Essential Oils with a history of antimicrobial, antiseptic, antifungal, conditioning and penetrating activity. The resulting combination is ClotrimazOil®. It is now recommended widely as a primary antifungal topical therapy, a complement to oral drugs and laser nail treatments, and a long-term recurrence preventative. It is FDA-approved, safe and effective.

No Reason to be 'Jubilant' — Still No Cure for Fully-Involved Onychomycosis

"If TV ads and free steak dinners correlated with improved treatment outcomes, we'd all be fat and rich" said my colleague. But no matter how many meals 'big pharma' buys us, or TV ads they run, there is still no cure for fungal nails we see in our practices every day.

It's hard to get excited about the latest 'wonder drug' — with complete cure rates under 18%, after 48 weeks of use, on 'mild to moderate' infected nails only 20-50% involved. How many of your patients seek treatment at that low infection threshold? Probably very few.

At a cost of hundreds of dollars per tiny tube and thousands more over the one year treatment time — generally NOT paid for by insurance — there is little to celebrate in those results, especially considering the likelihood of recurrence and re-infection.

Instead, improving appearance, symptom management and reducing the fungal burden are realistic outcomes for most patients.

ClotrimazOil® is a more cost-effective solution, and the first and only broad-spectrum 'azole' antifungal in this proprietary carrier formula.

So go ahead, enjoy a free steak dinner. But read the fine print in the study results. There's no reason to be jubilant. Switch to ClotrimazOil® — from old-fashioned Tolnaftate and Undecylenic Acid-based topical antifungals or over-priced 'wonder drugs', neither proving effective for our typical patients.

Exclusive Carrier Formula

ClotrimazOil® delivers Clotrimazole 1% to affected surfaces in a proprietary Essential Oils blend that includes Tea Tree, Jojoba, Peppermint, Sweet Almond and others.

Tea Tree Oil

Effective in vitro against dermatophytes found on the skin. In studies, it has been shown to stop bacteria, mold and fungal growth.

Jojoba Oil

Known as a fungicide, it is very similar to the sebum oil produced naturally by human glands, resulting in its popularity in many skin-care products.

Peppermint Oil

Has a long tradition of medicinal use, and is thought to activate cold-sensitive receptors in skin tissue, which is the primary source of the cooling sensation that follows its topical application.

Frequently Asked Questions

How should my patients use ClotrimazOil®?

By applying a thin coating to affected surfaces – skin between toes, on, around and under nails, wherever reachable with the applicator brush — twice daily — morning and night. Use sparingly — this is a concentrated formula. Allow to dry.

How long will it take to work?

Fungal infections are difficult to eliminate. Patients should notice results within days on infections between toes, with continued improvement over time. If used on, around and under nails, it generally takes about 1 year for nails to re-grow. Encourage your patients to keep using ClotrimazOil® even after their symptoms are gone — fungus will return if not thoroughly treated.

Can children and pregnant women use ClotrimazOil®?

Clotrimazole is safety rated 'B' for both groups, unlike other topical antifungals.

How long will a bottle of ClotrimazOil® last?

3-6 months or more, depending on the amount used daily and the size of the affected areas it is applied to.

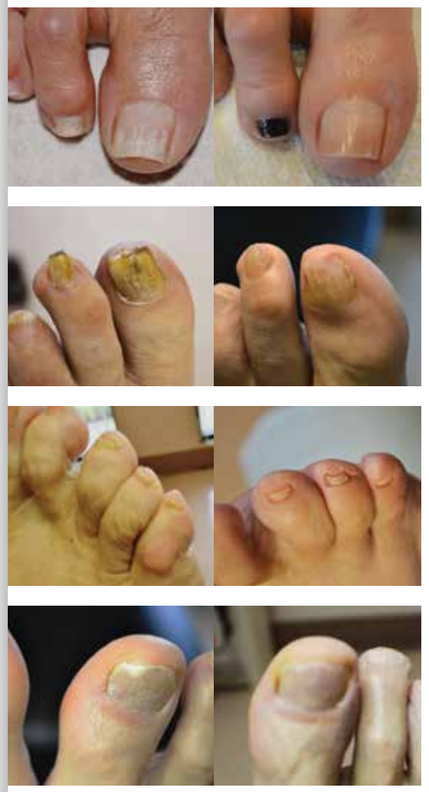
What if my patients aren't satisfied?

PediFix offers a Patient-Direct Satisfaction Guarantee. If for any reason you or your patients are not satisfied with the performance of ClotrimazOil®, we will refund the cost of their purchase, directly to them or you. For more information, call 1-800-424-5561.

"The most effective topical antifungal formulation I've ever used, and well worth a few extra pennies per day"
Dr. C., Deerfield Beach, FL

"I've used Tolnaftate products for so many years and they rarely work. I'm expecting superior clinical results with ClotrimazOil"
Dr. H, Westchester, NY

"Double-blind, multicenter, randomized, controlled trial of 117 patients found cure rates of 11 percent in the clotrimazole treated group and 18 percent in the tea tree oil group. Clinical assessment showed partial to full resolution in approximately 60 percent of the patients in both treatment groups."
Buck DS, Nidorf DM, Addino JG. Comparison of two topical preparations for the treatment of onychomycosis: Melaleuca alternifolia (tea tree) oil and clotrimazole. J Fam Pract. 1994;38(6):601-605.



New!

ClotrimazOil® Topical Antifungal Solution

The first topical with the broad spectrum antifungal power of Clotrimazole, in an exclusive penetrating carrier oils formula.

Highly effective on infected surfaces around, adjacent to and under nails where reachable with the convenient applicator brush.

- Kills 6 types of fungus, molds and yeasts
- Exclusive Essential and Carrier Oils formula
- Natural antioxidants and skin conditioners
- Urea to help soften nails
- Paraben-Free
- FDA-approved lab
- Made in the USA

PediFix Medical Footcare

‘Zap’ Shoes Clean to Fight Fungus, Infections, Odor & for Better Foot Health

15 Minute UV Shoe Sanitizer | ShoeZap®

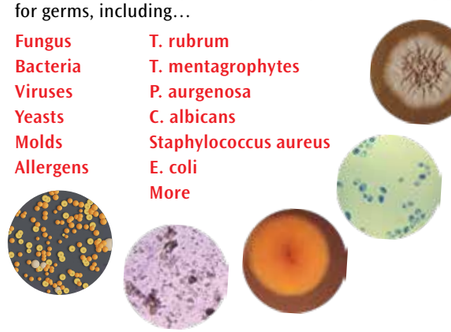
Kills fungus & bacteria that cause...

- Athlete’s Foot
- Toenail Fungus
- Diabetic Infections
- Foot & Shoe Odor

The Problem — Our Shoes Are Contaminated

Warm, dark and damp, shoes are the perfect breeding ground for germs, including…

Fungus	T. rubrum
Bacteria	T. mentagrophytes
Viruses	P. aurgenosa
Yeasts	C. albicans
Molds	Staphylococcus aureus
Allergens	E. coli
	More



If your patient’s feet or nails are, or have been, affected by any of the above, it’s likely their shoes are contaminated with these pathogens. Germ-filled shoes can be a source of foot and nail infections.

Fortunately, now there is help for people with these common foot conditions, and everyone wanting to keep their shoes cleaner, more hygienic and smelling fresh.

The Solution — ShoeZap®

- Sterilizes microbes that can attack, infect, and re-infect feet
- Disinfects & Deodorizes — kills bacteria that cause odors
- Keeps shoes microscopically-clean™, more hygienic and safer to wear

Proven technology — improved!

ShoeZap® is the first and only UV Sanitizer with all these unique advantages…

- Faster — works in just 15 minutes
- Simpler — ONE size Sanitizer fits ALL shoe sizes & styles
- Reversible — to fully disinfect the heel area, too
- Rugged — engineered for years of frequent use

How ShoeZap® Works

ShoeZap® emits UVC germicidal light (253.7 nm wavelength) that sterilizes micro-organisms. This same technology has been used worldwide for decades to sanitize air in hospitals, kill germs in drinking water, disinfect food preparation surfaces and more.

Science & Research

Numerous studies demonstrate the sanitizing power of UVC light. Others prove its effectiveness in footwear. See research, studies, expert opinions and more on our website here: http://www.pedifix.com/t-szstudies.aspx

ShoeZap® — Instead of Toxic Shoe Sprays

Shoe sprays have limited, short-term effect on germs. Worse, the chemicals that might kill microbes can leave a toxic residue in footwear. Re-activated by perspiration, this creates an unhealthy ‘foot bath’ feet are then trapped in all day. ShoeZap® is ‘green technology’ — no smelly fumes, aerosol dispersants or lingering chemicals in shoes. And over time, ShoeZap® costs less, too.

Works in ALL types of footwear!

Two Ways to Help Your Patients to Better Foot Health with ShoeZap®

1. “Treat Their Shoes While You Treat Their Feet”™

It works so fast, you can ‘Zap’ patient’s footwear during their appointments. Doing so helps them understand its simplicity and benefits, and encourages purchase for home use. Complimentary ShoeZap treatments are highly appreciated by patients, and a foot health benefit.

2. Recommend, Dispense or Prescribe ShoeZap®

ShoeZap is available for in-office patient purchase — a convenience for them, with profits for your practice — or via patient direct order at 1-800-PEDIFIX, www.pedifix.com, and by mail, fax or email. It may also be available in stores near your practice for retail referral in the future (it’s being introduced first to healthcare professionals).

15 Minutes and 4 Easy Steps to Microscopically-Clean™ Shoes

1 Place Sanitizers in Shoes

2 Place Shoes & Sanitizers in UV-Proof Safety Bags

3 Power ‘On’

4 Device Turns Off Automatically After 15-Minute Treatment

Frequently Asked Questions

Who should use ShoeZap®?

Everyone! Especially people susceptible to, wanting to prevent, or being treated for odor, fungus, skin, toenail, diabetic or post-op infections, those with compromised immunity, and anyone who wants to be proactive about their shoe cleanliness, foot health and hygiene.

How often should I use ShoeZap®?

The more often, the better. Daily or every-other-day use is recommended to patients who wear the same shoes every day, don’t wear socks, perspire heavily or have an active skin or nail infection. Weekly, monthly and seasonal use is suggested for shoes worn less frequently.

How does ShoeZap® complement medical treatments for toenail fungus, Athlete’s Foot and other infections?

Helping reduce the chance of recurrence and re-infection from contaminated shoes, ShoeZap® can enhance results from laser, oral and topical treatments.

ShoeZap® is the better, faster, safer way to kill germs that can infect your patient’s footwear. And yours. Get ShoeZap for yourself, and your family, in addition to your patients and practice. Order today to reduce the chance of infection, and enjoy cleaner, more hygienic shoes.

To order, or get more information, contact us or your PediFix supplier today!

Dr. S.L., DPM

FungaFiles® New!

First Disposable Files for Fungal Nails & Warts

Encourage patient at-home debridement between visits to speed treatment results. Sized for precise use on varying surfaces these extra-gritty, double-sided, miniature files help remove fungal debris to help nails look better and make them thinner for easier trimming. Effective on warts to remove dead tissue, allow topical agents to penetrate deeper. Unique 24-piece, 'matchbook' package encourages frequent use and disposal. Complements oral, topical and laser therapies.

12 packs/bag	Item#	Price

Pedi-Quick® Pedicure Kit

Soft, Smooth, Healthy-Looking Feet…Fast!

Electric-powered to remove rough, thick calluses, keeps heels soft & smooth. Two surfaces — stainless steel rotary Microfile and Emery Buffer. Powerful motor, large grooming discs and easy-to-hold hand-piece design. (Uses 4AA batteries, not included.)

	Item#	Price
1 Kit	#P3349	$12.50

Replacement Emery Discs

3/pk	#P3348	$1.25

Includes 2 Attachments:
1 Rotary MicroFile
1 Emery Buffer

Pedi-Quick® Dual-Action Foot File

Quickly Reduces Corns and Calluses

Stainless steel 'coarse' surface on one side for faster, more aggressive action, 'fine' emery surface on the other, for gentle filing.

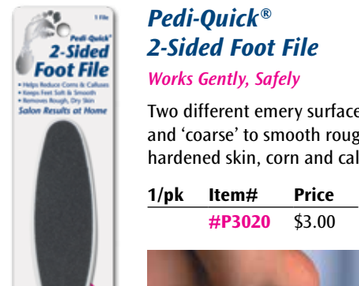
1/pk	Item#	Price
	#P3011	$2.50

Pedi-Quick® Step-N-Smooth® Shower Foot File

Smoother Feet — No Bending!

Simply rub feet against this unique surface to safely and easily smooth calluses and rough, dry skin. Long-lasting mat rests on shower floor. Non-skid backing keeps it securely positioned. Great for people who cannot easily bend to reach their feet.

1/pk	Item#	Price
	#P3030	$9.95



Pedi-Quick® 2-Sided Foot File

Works Gently, Safely

Two different emery surfaces — 'fine' and 'coarse' to smooth rough, dry, hardened skin, corn and calluses.

1/pk	Item#	Price
	#P3020	$3.00

(Sizing is approximate)		

Place cold packs where needed: arch, heel or top of foot

EZ Mornings™ Plantar Fasciitis Nighttime Stretching Splint

Stubborn plantar fascia condition?
Morning heel pain a problem for your patients?

Speed the healing process and let them wake up without discomfort. This unique splint maintains the foot in a dorsi-flexed position to stretch the plantar fascia while patients sleep. Helps minimize fibrous tears that occur when patients first walk after periods of rest. If you haven't tried a NightSplint, you haven't tried everything to relieve plantar fasciitis. Also effective for Achilles tendonitis. Soft, comfortable construction, adjustable hook-n-loop fastener, non-slip sole. Fits Right or Left foot.

1/pk	Item#	Price
Small (fits up to Women's shoe sizes 9, Men's 8)	#6040-S	$19.95
Large (fits Women's shoe sizes 9 ½+, Men's 8 ½+)	#6040-L	$19.95

HCPCS Code: L4396

Stretches from midfoot, not toes, for greater comfort and patient compliance.

Preforms®...

In the vast majority of cases, 'ready-made' orthotics, like those you'll find here, are sufficient for relieving common foot complaints, certainly as an initial treatment option. Used 'as is' or customized with top covers, posts and other modifications, Preforms® work. For most patients, especially children who outgrow orthotics quickly, and adults who can't afford or don't need custom devices, Preforms® offer a proven treatment alternative that often produces 'custom' results.

Clinically-proven effective in more than 1,000,000 actual patient applications.

Sports Preforms® Orthotics

OTC-Packaged PediFix® Footcare Products . . . Recommend Them with Confidence

The products you trust, OTC-packaged, for easier, more profitable dispensing from your office or clinic, referral to a nearby store, or patient direct ordering. You choose how best to get PediFix products to your patients.

"I know your quality is unmatched, so PediFix is the only brand I suggest to my patients."
Dr. C, Phoenix, AZ

4′ Medical Footcare Center #D40

Dispense

Dispense PediFix® OTC-Packaged Footcare Products from your office or clinic…

- Patients appreciate the convenience of getting these from you,
- They're more professional,
- Each package offers directions for use, care and warnings to increase patient compliance,
- They're easier to charge for, reducing your costs of giving away treatment products for free (instead, generating sales and profits for your practice),
- Consider Dispensary Displays (pages 60–63) to organize, stock and show these items in your office or clinic.

Counter-Top Spinner Display #D17

Prescribe

Prescribe PediFix® OTC-Packaged Footcare Products through a nearby retailer…

- Get Prescription Pads, Patient Product Brochures, samples, more.
- Call us to locate or arrange local availability in an independent pharmacy, DME or comfort shoe store near you.

Prescription Pads #L2041

Patient Direct Order

Enable your patients to purchase PediFix® OTC-Packaged products directly from PediFix…

- Call for Direct Order Brochures you can give to patients
- Guide patients to the consumer/patient portal at www.pedifix.com.

Please note, higher prices (typically double your wholesale costs included here) and shipping charges apply to patient direct orders. For these reasons, ***please do not give this catalog, or copies of pages, to your patients.***

In-Office Dispensing Simplified & Professionalized with PediFix® OTC

Giving treatment products away for free? Sending patients online to find them? Instead, boost compliance by offering the medical footcare products they need, at the time of their visit. These professional displays transform small space — in waiting or treatment rooms, on or near a reception desk or nurse's station — into a productive footcare product center.

- Convenience for your patients…boosts compliance, for better outcomes
- Revenue for your practice…easier to charge for
- Professional packaging enhances your image

Choose a display for your office or clinic today!

Floor Spinner Display

#D77

"I rely on PediFix products for many of my patients. In-office dispensing makes it so easy to be sure that they get the right products, right away."
Dr. G., Tamarac, FL

This mobile, two-sided 'spinner' features 50 of the most popular PediFix® products, in a space-saving 'footprint'. Includes a small assortment of insoles, heel cups and skincare items on bottom shelves. Heavy-duty, quality construction.

Tea Tree Ultimates® Soaking Crystals™ Display
Contains: (6) P3078
#D09-SC — $36.00

Deep-Healing Foot Cream™ Display
Contains: (12) P3069
#D09-DHFC — $59.40

Displays are free with full assortment purchase. Since we don't charge for the display box, we appreciate you re-filling these when empty rather than ordering new displays (unless they need replacing, of course)!

"In Office Dispensing is good because you can advise patients on products and benefits, rather than sending them to a store that doesn't know the benefits… I like to have the product available and advise on its use. Sometimes too you have to prompt patients to make them use what they need."
Dr. W., Bronx, NY

PediFix Medical Footcare

PEDIFIX OTC

"Now that I practice in a hospital, I can no longer dispense these treatment products. Instead, I tell my patients, staff, family and friends to ask for PediFix in their locally-owned pharmacy"
P.K., MD

PediFix® OTC

Exclusive choices, only from PediFix®...

Dispense For the highest compliance and best outcomes, stock and dispense PediFix products to your patients. Choose OTC or traditional medical packaging options.

Prescribe Refer patients to locally-owned retailers (not chain stores) to get the products they need, immediately. See our online store locator, or call for the names and locations of stores near you that carry PediFix.

Patient Direct Order Enable your patients to purchase directly from PediFix via phone 1-800-PEDIFIX, free Patient Brochures, or online at pedifix.com (not amazon — too many counterfeit products).

No matter what your practice setting, give your patients the benefits of long-lasting relief. Help them 'get the good stuff' — PediFix Medical Footcare products.
